

# DESKTOPS

## ALL-IN-ONE/TOUCH-SCREEN/ APPLE IMAC WITH RETINA 5K DISPLAY

The latest iteration of the Apple iMac with Retina 5K Display delivers 14.7 million pixels to your desktop in a sleek package. It's the system to get if you perform a lot of tasks that require insane levels of visual detail, such as graphics, photography, scientific analysis, and 4K video production.

## BUDGET / INTEL COMPUTE STICK

The Intel Compute Stick fits in the palm of your hand and can be used with any HDMI-equipped display. It's like a Google Chromecast, but instead of a simple media streamer, it's a full Windows PC. The Compute Stick is easy to set up, and is the most portable computer you can buy.

## MAINSTREAM CONSUMER/ ACER REVO ONE (RL85-UR45)

The Acer Revo One is a small-form-factor desktop with the power to handle content creation, but it's small enough to hide under an HDTV or large-screen monitor. It's ready for 1080p HD and 4K UHD video playback via HDMI and Mini DisplayPort connections. Expandability is a plus, and it can act as your own personal cloud server using Acer's bring-your-own-cloud services.
